Volume 6, no. 3, e00647-15, 2015, <https://doi.org/10.1128/mBio.00647-15>. The compound that was used in our article was *N'*-(3-bromo-6-hydroxybenzylidene)-2-methylbenzohydrazide (BHBM) and not *N'*-(3-bromo-4-hydroxybenzylidene)-2-methylbenzohydrazide. All experiments described in the paper were done using BHBM [*N'*-(3-bromo-6-hydroxybenzylidene)-2-methylbenzohydrazide], and the structure noted in Fig. 1B of our original article should be as indicated in Fig. 1 here.

The structure of BHBM used in the *mBio* studies was confirmed by proton nuclear magnetic resonance (NMR), which indicated the following chemical shifts: ¹H NMR (500 MHz, dimethyl sulfoxide-*d*₆) δ 2.38 (s, 3H), 6.90 (d, 1H, *J* = 8.8 Hz), 7.28 to 7.32 (m, 3H), 7.37 to 7.43 (m, 2H), 7.47 (d, 1H, *J* = 7.5 Hz), 7.78 (s, 1H), 8.47 (s, 1H), 11.19 (s, 1H), 12.05 (s, 1H).

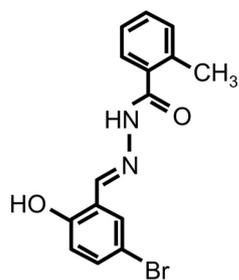

FIG 1 Corrected structure of BIBM to replace the structure in Fig. 1B of our original article.

All findings illustrated in the paper are correct.
